Indore

EDUCATION

BTech - MTech(IT) Dual Degree 5yrs

International Institute of Professional Studies, DAVV Indore

7/2022 – 6/2027

CGPA: 9.1/10

EXPERIENCE

Software Developer Intern

02/2026 – Present

github.com/Somya0827/MessKhata

- Built and deployed a live full-stack mess management web app (MessKhata) from scratch using React.js 19, Tailwind, and Supabase for real-world clients and integrate CI/CD pipeline using tools like render, vercel and github.
- Partnered with cross-functional teams in a Scrum environment to manage the full lifecycle from requirements to client handoff, meeting 100% of milestones.
- Implemented PostgreSQL RLS and custom indexing, ensuring 100% tenant data isolation and reducing query search latency by 35% refactoring
- Built dynamic background status checks, a 10-day auto-archive buffer, and zero-cost WhatsApp API triggers that reduced administrative work by 40%.

Frontend Intern

05/2025 – 12/2025

Summer Internship at DAVV, Indore

- Built structured dashboards and workflows for managing users and academic data efficiently. boosted application performance by 30% through advanced code-splitting.
- Improved interface responsiveness and layout clarity across 10+ UI pages for smoother usability. refactoring
- Worked closely with faculty and the technical team to gather requirements and deliver a reliable system.

PROJECTS

Employee-Management-System

11/2025 – 12/2025

github.com/Somya0827/EMS-Employee-Management-System

Role-based employee task management system, using React, Node, tailwind and MongoDB

- Developed a role-based Employee Management System with separate Admin and Employee dashboards, improving task tracking efficiency by 40%.
- Managed application state across 7+ components using Context API, reducing prop drilling and improving code maintainability.
- Integrated Local Storage for persistent session and task management, achieving 100% data retention across browser refreshes without backend dependency.

AI-Powered Coding Practice & Interview Preparation Platform

09/2025 – 11/2025

github.com/Somya0827/Ai-Coding-Platform

- Developed a full-stack AI-powered coding platform featuring 200+ coding problems, mock interviews, and real-time progress tracking for interview preparation.
- Integrated AI-based feedback, automated code evaluation, and responsive dashboards, reducing manual review efforts by 60% and improving user engagement.
- Implemented secure authentication, dynamic routing, and optimized frontend workflows across 10+ interactive pages, improving application performance and scalability.

Time Table Management

05/2025 – 07/2025

github.com/Somya0827/TT-Management-System

React.js, Supabase, Golang, Git/Github

- Developed a role-based Time Table Management System with automated scheduling workflows for faculty and administrators.
- Optimized frontend performance using code-splitting and lazy loading techniques, improving application responsiveness.
- Engineered 100% CRUD functionality with real-time validation and integrated 20+ REST API endpoints for seamless academic data management.

SKILLS

Front-end: React, JavaScript, HTML, CSS, Tailwind

Back-end: Node.js, Express.js

Database: MongoDB, Sequel, Supabase

Languages: Java, PL/SQL, C, C++

Tools: Bootstrap, Git/GitHub, Postman, Figma

KEY ACHIEVEMENTS

Hackathon & Open Source Achievement

Secured Runner-Up position in a college hackathon among 100+ participants and received the award for Maximum GitHub Commits for consistent contribution, collaboration, and active development throughout the event.

Academic Excellence

Scored 95% in CBSE 12th Boards, achieved 87 percentile in JEE Mains, and maintained a consistent 9+ CGPA in BTech.
